DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

Claim 1 recites a dual band linear antenna array comprising four hard linear conductors to form a radiator, wherein the conductors are equidistantly rooted at four corners and parallel to each other, three of the conductors having a first length of one quarter wavelength of a first electric wave, and one of the conductors having a second length of one quarter wavelength of a second electric wave, and wherein the first electric wave has a frequency lower than that of the second electric wave.

Claim 8 recites a dual band linear antenna array comprising three hard linear conductors to form a radiator, wherein the conductors are equidistantly rooted at three corners and parallel to each other, two of the conductors having a first length of one quarter wavelength of a first electric wave, and one of the conductors having a second length of one quarter wavelength of a second electric wave, and wherein the first electric wave has a frequency lower than that of the second electric wave.

None of the prior arts shows or suggests this dual band antenna.

Conclusion

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tan Ho whose telephone number is (571) 272-1822. The examiner can normally be reached on M-F (8:00AM - 5:00PM).
